Product Description

PermaGreen Triumph Commercial Ride-On Sprayer Spreader

The Triumph ride-on spreader sprayer treats an acre in 15 minutes, spreading and spraying, as well as lawns as small as 1,000 ft! Our motto: Do 'em Better, Do 'em Faster, Do 'em All!

The Triumph spreads and sprays a total of 14 feet for an effective spray width of 8'4", providing a perfect double overlap for 8-foot turns. Other spreader sprayers actually spray the same width or less, despite advertising wider.

Permagreens have patented features, such as dropdown handlebars, to make it the most versatile standing spreader sprayers available. Here the tech can conquer a hill that otherwise could not be scaled.
