### Product Description

## Orec Snow Rhino | Zero Turn Snow Plow

### Snow Removal Like You've Never Imagined

Bringing truly inspired innovation to the snow removal industry, the Snow Rhino is unlike anything you have seen before. While this zero turn snow plow is compact enough to get to those hard to reach areas, do not let that fool you. This track drive snowplow packs enough power to tackle even the most brutal of snowstorms. The first machine of its kind on the market, zero turn allows you to maneuver with precision and ease.

Speaking of ease, with the Snow Rhino, there is no more strenuous hours spent shoveling sidewalks because this machine allows you to stand on it while operating, making it ideal for professional snow removal teams and homeowners alike. Adjustable blade length, plow angle, and hydraulic plow height adjustment are just some of the other unique components of convenience that make this stand-on, zero turn snow plow, the ultimate machine to completely reinvent the way you clear snow.

The Snow Rhino is the first of its kind, a track driven zero-turn stand on snow plow. It goes up to 5.6 mph forward, much faster than other methods of clearing snow from sidewalks and tight spaces. Plow has a float and full trip design, electric/hydraulic cylinder to lift or lower the plow, and an easy to use manual angle adjustment which locks into place at 0, 15, or 30 degrees. Equipped with a charging system for the battery, it can be started by turning a key or a manual pull start. The stand-on platform allows the operator to plow at faster speeds, but it can also be locked upright for walking behind. The tracks provide outstanding traction to ensure optimum performance. Equipped with Head and Rear lights to assist with visibility. The plow blade is 34" inches wide, allowing clearance to landscaping when clearing a 36" sidewalk. It comes with two 6" plow extensions so that it can plow up to 46" wide, allowing clearance to landscaping when clearing a 48" sidewalk. Equipped with durable Honda 10.7 HP engine.

Speed: Up to 5.6 mph forward, up to 3.3 mph reverse

Plow Width: 34", extends to 46" with two 6" bolt-on extensions

Plow Height: 18"
